

*Animal Medical Clinic
3045 Market Avenue
Fayetteville, Arkansas 72703*

At the ANIMAL MEDICAL CLINIC, our primary concern is your pet. We understand that you are concerned about your pet's discomfort after surgery. That is why we have invested in the new **AccuVet™ CO₂ laser technology**.

The laser seals tiny nerve endings and pain receptors, which help your pet recover with much less pain. The laser also seals small blood vessels which greatly reduces the amount of bleeding during surgery. Overall, your pet will recover more quickly and safely.

The additional fee for using the laser on **SPAYS, NEUTERS AND DECLAWS is \$30.00**. We are sure you are going to be happy with the results and know your pet will appreciate them as well. Please let our staff members know you would like to reserve time with the laser. Thank you for trusting the Doctors of the ANIMAL MEDICAL CLINIC.

Please inquire about fees for all other surgeries

- Yes, I would like the surgeon to use the AccuVet Laser
- No, I would prefer not to use to laser.
